REQUEST FOR CORRECTED NOTICE OF ALLOWANCE

Dear Sir/Madam:

On March 5, 2010 a Notice of Allowance and Fees Due was issued for the above-referenced patent application. We note that the title of the invention printed on the Notice of Allowance is incorrect.

The application was filed under the title METHOD AND DEVICE FOR WATERMARKING AN IMAGE, as shown in the Transmittal Letter, Form PTO-1390 and in the English translation document. The Filing Receipt issued on March 15, 2007 also shows the title as METHOD AND DEVICE FOR WATERMARKING AN IMAGE.

We request a corrected Notice of Allowance be issued with the correct title METHOD AND DEVICE FOR WATERMARKING AN IMAGE. Copies of the pertinent pages of the documents named above are attached.

Respectfully submitted,

Method and device for watermarking an image

The present invention concerns a method and device for watermarking an image comprising at least three components.

It also concerns a method and device for detecting a signature inserted in an image comprising at least three components.

The invention is situated in the field of watermarking, images comprising several components such as for example color images. These watermarking techniques can for example be used for protecting copyright on a digital image.

The watermark inserted in an image must amongst other things be robust to the various manipulations of the image. Such manipulations are for example compression thereof.

The watermark inserted in an image must also be imperceptible in order to preserve the quality of the image.

In the French patent application filed under the number 0304592 by the present applicant and not yet published there are described a method and device for watermarking a colored image by vector approximation, taking account of its color dimension.

According to this application, the watermarking of an

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER**Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.
